DETAILED ACTION

Allowable Subject Matter

1. Claims 1-65 are allowed.

The following is an examiner's statement of reasons for allowance: Prior art of record does not disclose, in single or in combination, claimed reservation request of a first type sent into a first minislot of a frame of uplink channel when information of first type is to be sent, requesting an assignment for at least one slot for transmitting information of first type in at least one subsequent frame, a reservation request of second type sent into second minislot when second minislot is available requesting at least one slot for transmitting information of second type in subsequent frame, based on a pseudo-Bayesian Aloha algorithm, downlink channel containing feedback message having minislot assignment information for sending reservation requests of first and second types, slot assignment information, minislot contention information for reservation requests and reservation backlog information for an estimated number of second type reservation requests, feedback message occurring prior to end of selected frame of uplink channel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
